EDUCATION

Master of Science in Petroleum Engineering / *University of Tulsa*, Tulsa, OK | GPA 3.50/4.00 **Expected May 2027**

Relevant Coursework: Advanced Drilling, Drilling Optimization, Formation Evaluation, Advanced Production Design, Transient Multiphase Production Design, Two-Phase Flow Modeling, Flow Assurance

Bachelor of Science in Petroleum Engineering / *University of Oklahoma*, Norman, OK **Dec 2024**

ENGINEERING EXPERIENCE

Graduate Research Assistant / *Tulsa University Artificial Lift Projects (TUALP)*, Tulsa, OK **Aug 2025 - Present**

- Building a **coupled rod, tubing, and fluid dynamic model** for vertical and deviated sucker-rod pumped wells, based on 1D virtual work and momentum conservation
- Designing **tapered rod strings and sinker bars** to equalize **modified Goodman stress ratios** and lower rod fatigue

Drilling Intern / *PetroVietnam Exploration Production Corporation (PVEP-POC)*, Vietnam **Mar 2025 - Jul 2025**

- Took part in **directional well planning**: bit selection, mud weight programs, and casing design
- Helped with **BHA design** and **cement displacement calculations** for zonal isolation
- Used petrophysical, lithology, and downhole pressure data to find ways to **improve ROP and cut NPT**
- Worked on the **rig floor** during drilling, including **managed pressure drilling (MPD)** and well control

Petrophysics Researcher and Intern / *Integrated Core Characterization Center (IC3)*, Norman, OK **Jun 2023 - Aug 2024**

- Measured **porosity** (helium pycnometry) and **permeability** on core samples; compared helium and **NMR** porosity
- Measured formation water **salinity vs. resistivity** to get **brine resistivity (Rw)** for Archie log interpretation
- Prepared core samples and ran **FT-IR spectroscopy**, following lab calibration, data QA/QC, and safety procedures

TECHNICAL PROJECTS

Petroleum Data Analytics and Production Forecasting / *University of Oklahoma* **Jan 2024 - May 2024**

- Built **decline curves and type curves** in ComboCurve to forecast production and well economics
- Used **Enverus** basin data to compare operators, completion designs, and EUR
- Wrote **Python** scripts (Pandas, NumPy, Matplotlib) to clean well logs and make cross-plots, replacing manual spreadsheets

Subsurface Reservoir Modeling / *University of Oklahoma* **Aug 2023 - Dec 2023**

- Built a **3D structural grid in Petrel**, interpreted faults, and built facies and porosity models
- Correlated gamma ray, resistivity, and density/neutron logs across multiple wells to pick **pay zones**

TECHNICAL SKILLS

- Petroleum Software:** Petrel, ComboCurve, Enverus, OLGA (transient and steady-state multiphase flow)
- Engineering:** Well planning, casing and BHA design, cementing, sucker-rod lift design, decline curve analysis, production forecasting, log interpretation
- Lab:** Porosity and permeability, NMR, helium pycnometry, FT-IR spectroscopy, core sample prep
- Programming:** Python (NumPy, Pandas, Matplotlib, Seaborn), Jupyter Notebook, Streamlit
- Other:** Valid U.S. driver's license

LEADERSHIP

Treasurer and Social Media Chair / *SPWLA, OU Chapter* **Jan 2024 - Dec 2024**

- Handled chapter finances and budget reports; promoted technical lectures to students and industry

Membership Chair and Conference Chair / *SPE, OU Chapter* **Jan 2022 - May 2024**

- Led member recruitment and represented the chapter at regional conferences; chapter won the **SPE OKC Platinum Award**
